Boolfy launches AI-powered Expense Management solution at Web Summit 2025, already used in Argentina, Brazil and Mexico

Rio de Janeiro, April 14, 2025 – At Web Summit 2025, Boolfy officially announces the launch of its **AI-powered Expense Management** solution, a tool designed to help businesses automate employee expense workflows, reduce fraud, and ensure tax compliance across Latin America.

Boolfy's platform, which has already processed **over 1 million expense documents**, is now live and being used by companies in **Argentina, Brazil, and Mexico**. The solution combines OCR, AI Agents and a multilingual tax engine to handle receipts, invoices, and travel expenses — all while reducing manual work and approval time.

“We built Boolfy to remove the friction of document-based processes. Our Expense Management module is now helping teams focus on real value instead of chasing receipts and approvals,” said **Ing. Andy Tarrab, CEO and Co-Founder of Boolfy**.

The announcement comes at a critical time when companies are seeking leaner operations and tighter control over spending. With remote and hybrid work models here to stay, Boolfy offers a fast-to-implement solution that scales from small teams to large enterprises.

Key highlights:

- Over **1 million expenses** processed to date
- Clients live in **Argentina, Brazil and Mexico**
- Built-in **fraud detection** and **local tax validation**
- No setup cost and **live in 48 hours**

About Boolfy

Boolfy is a B2B SaaS company specializing in smart document processing through AI Agents. Its no-code platform reads and understands documents like invoices, contracts, and receipts, enabling companies to automate processes with zero development effort. Boolfy is used by legal firms, manufacturers, and tech companies across Latin America and Europe.
